

Tanzu Application Services to Kubernetes Migration

Trusted migration partner, training, and managed K8s

Many organizations turned to Pivotal Cloud Foundry (PCF), also known as Tanzu Application Service (TAS) or VMware Cloud Foundation, to deploy applications to the cloud because it offered a container-based architecture to run apps in any programming language over different cloud service providers.

Unfortunately, Broadcom's acquisition of VMware has increased pricing and lock-in within the ecosystem. For many organizations, this is the ideal time to migrate to Kubernetes, the infrastructure platform trusted and supported by organizations around the world.

Trusted Migration Partners

Fairwinds:

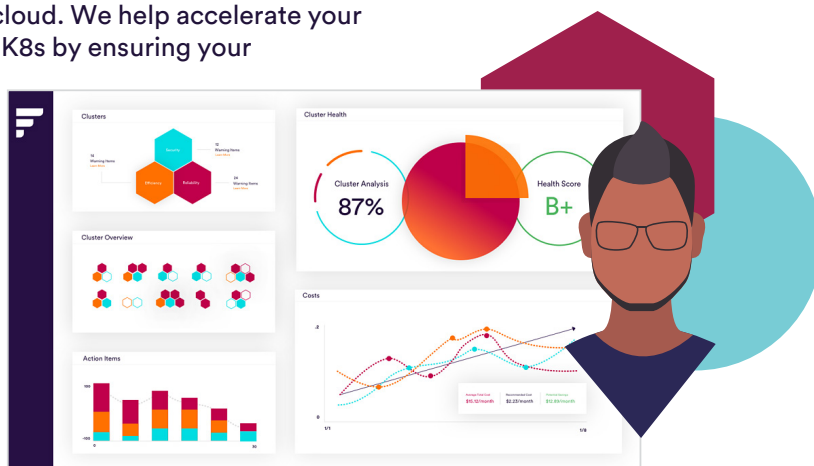

- Manages your Kubernetes infrastructure at enterprise scale
- Provides 24/7 monitoring, upgrades, and security patching
- 15 minute response service level objective (SLO) for pager-triggered production incidents
- Slack-based support and expertise

SuperOrbital:

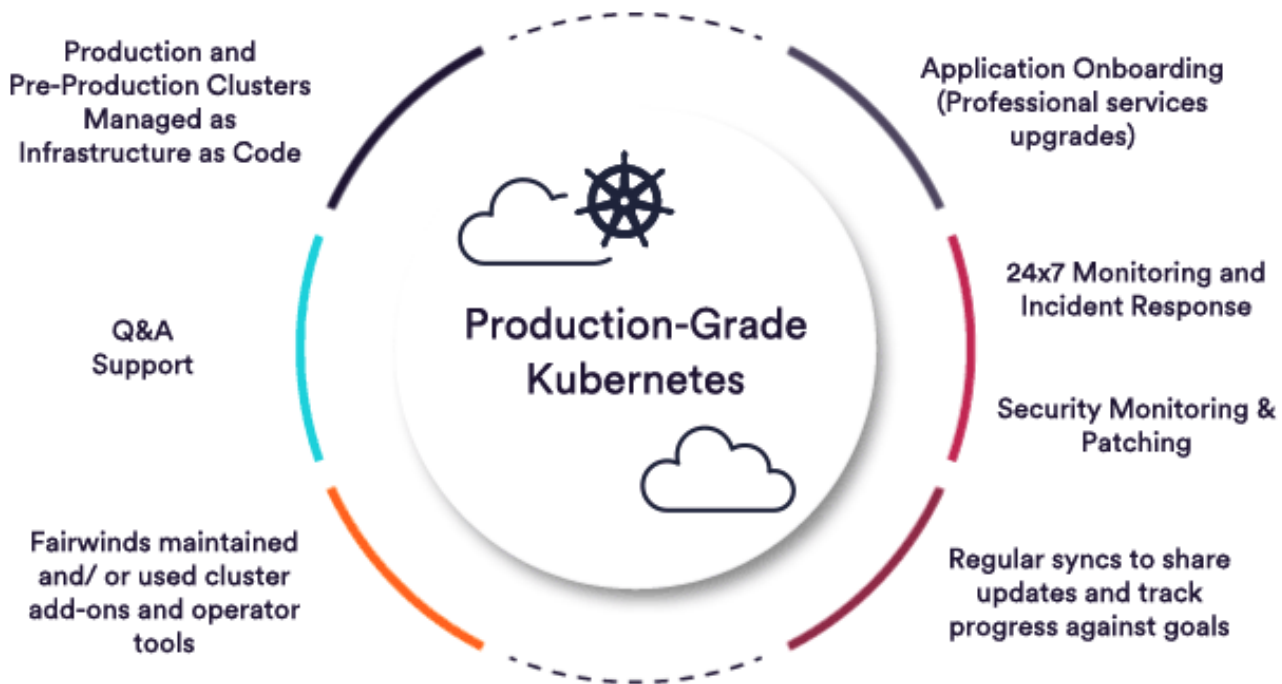

- Translates your PCF/TAS workloads and BOSH release to Kubernetes
- Builds your Kubernetes platform
- Migrates your 12 factor applications, PCF/TAS services, and BOSH releases
- Trains your team to make the most of Kubernetes

Bundling Training and Managed Services

We don't just lift-and-shift. We provide in-depth training offerings that build mutual understanding and longevity throughout your engineering teams. Fairwinds' people-led service includes 24x7 monitoring and incident response for your Kubernetes infrastructure so you can deploy your applications confidently. SuperOrbital delivers the training and transition, while Fairwinds provides fully managed production-grade Kubernetes in your cloud. We help accelerate your time to value and support the move from PCF to K8s by ensuring your infrastructure is reliable and secure.

<p>Technologies and core competencies</p> <ul style="list-style-type: none"> • All major cloud providers • On-premises bare metal infrastructure • TAS/PCF <i>and</i> Kubernetes expertise • Application <i>and</i> Infrastructure migration 	<p>Services</p> <ul style="list-style-type: none"> • Hands-on Cloud Native training • Ongoing Kubernetes infrastructure management • People-led service simplifies onboarding and increases speed to production • Enables developer self-service and fine-grained access control

WHY FAIRWINDS

Fairwinds provides people-led services and software that enables organizations to run and optimize mission-critical applications and services on Kubernetes infrastructure at scale without compromising security, reliability, and cost efficiency. With Fairwinds, platform and engineering teams decrease friction, increase developer velocity, and improve the developer experience to accelerate time to market and revenue generation. Customers ship cloud native applications faster, more cost-effectively, and with less risk.
